

# St. Joseph's Robotics Club

We are so excited to announce, St. Joseph's Robotics Club will begin following Easter break! All students in grades 5-8 are welcome to join Ms. Walsh and Mr. Woolsey every Friday morning, from April 17 - May 22, 7:30 - 8:20a.m. in the Maker's Space.

This spring we will focus on, learning how to:

- Program a robot
- Build and add attachments to a robot
- Work together as a team to complete a challenge

Our plan is to give exposure to Lego Robotics this spring, to prepare us to join the First *Lego League* competitions in the fall. (There will be a cost for this in the fall.) This spring there is no cost for the students to participate. Please cut, fill out the form below and return it to the school office.

For any further questions, please reach out to Ms. Walsh at [kawalsh@stjosephwsp.org](mailto:kawalsh@stjosephwsp.org)
